DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3, 11, and 28-31 are allowed.
2. The following is an examiner's statement of reasons for allowance: The Independent claims of the Applicant's invention are directed towards a system and computer network implemented method for managing promotions over a network. The invention includes a promotion server, a retailer's commercial server, and a consumer's client computer which are operable connected to the Internet. Said consumer's client computer can request from said retailer's commercial server a promotion (electronic token) and said retailer's commercial server responds to the request by automatically obtaining from said promotion server promotion authorization data for said promotion. Said retailer's commercial server whether to accept or decline the request, and the retailer's commercial server generates a script for a website frame having a predetermined signature with an electronic toke or coupon that corresponds to that predetermined signature.

Gerace (U.S. Patent Number: 5,848,396) a customized advertising system in which psychographic and demographic profiles are used to determine whether or not advertisements are displayed to a user. In the teachings of Gerace a request for a promotion is received and a determination is made as to whether the advertisement is appropriate for the display to the user based upon the psychographic and demographic profiles(Col 2, lines 1-15; and Col 2, lines 30-35). The teachings of Gerace also disclose use of sponsor IDs associated with said promotions (Col. 12, lines 7-11). However,

Gerace does not disclose that automatically generating a website frame that has a predetermined signature and a coupon that also has a predetermined signature wherein specific data granting authorization for the promotion is obtained from a promotion server, and said retailer's commercial server determines whether to accept or decline the promotion based upon said specific data granting authorization. The distinction between the authorization of the Applicant's invention is that it uses predetermined signatures specifically authorizing the promotion and the disclosure of Gerace used user profiles to determine whether or not the promotion is appropriate for the user. Furthermore, Gerace discloses a client entering a request into a client computer to visit a website or following a link to another website where in promotions are displayed based upon the arrival to the requested landing page. Whereas the applicants invention requires that "retailer's commercial server responds to requests from said consumer's client computer for said promotion".

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee, and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance.
